

Section 9 - Enhanced Plan Elements

This section of the Plan will be developed following FEMA approval of the basic plan.

Contents of this Section

- 9.1 General Description of IFR Requirements for Enhanced Mitigation Plan
- 9.2 Demonstration that the State has developed a comprehensive mitigation program
- 9.3 Demonstration of plan integration into State and regional planning initiatives
- 9.4 Documentation of State's project implementation capability
- 9.5 Eligibility criteria for multi-hazard mitigation measures
- 9.6 System to determine cost-effectiveness of mitigation measures
- 9.7 State's capability to manage HMGP and other grant programs
- 9.8 System/strategy for assessing completed mitigation actions
- 9.9 Demonstration that the State effectively uses existing mitigation programs to achieve its mitigation goals
- 9.10 Demonstration that the State is committed to comprehensive State mitigation program
- 9.11 State review and revision of plan IFR 201.5 (c)

After adoption of the initial Plan in 2004, AEMA began taking steps to achieve enhanced plan status. However, due to a series of catastrophic natural disasters that occurred, AEMA and the State of Alabama shifted their priorities towards response and recovery. AEMA has resumed this effort and is currently working towards developing enhanced plan elements.
